

1. (Thrice Amended) A business method relating to beverage containers having sealed apertures comprising:

conveying by profit making sale a right to attach indicia to consumer removed, ~~highly~~ flexible and ~~collectable~~ protective members to be adhered to the sealed beverage containers;

manufacturing the protective members;

applying indicia to the protective members; and

adhering the protective members to the sealed containers to form a substantially wrinkle free skin tight seal between the protective member and at least a portion of a mouth contact area of the beverage containers.

2. (Original) The method of claim 1 in which conveying the right to attach indicia to protective members to be adhered to beverage containers is achieved by selling the right to third parties.

3. (Thrice Amended) ~~The method of claim 1 in which~~ A business method relating to beverage containers having sealed apertures comprising:

conveying by profit making sale a right to attach indicia to consumer removed, flexible protective members to be adhered to the sealed beverage containers;

manufacturing the protective members, the protective members ~~are~~ being made in an hourglass configuration to facilitate adherence to a top and convex side of a container

without deformation and without wrinkling of a material of the protective member by folding it over a rim of a beverage can when adherence occurs;

applying indicia to the protective members; and

adhering the protective members to the sealed containers to form a substantially wrinkle free skin tight seal between the protective member and at least a portion of a mouth contact area of the beverage container.

4. (Currently Amended) The method of claim 1 which further comprises sanitizing at least [[a]] the mouth contact portion of the containers.

5. (Original) The method of claim 1 in which the indicia is at least one of advertising, promotion, games of chance, premiums, collectibles, redeemables, merchandise acquisition means, prizes, public service announcements, instructional information, and warnings.

6. (Once Amended) The method of claim 1 wherein indicia is applied to the protective members by printing.

7. (Original) The method of claim 6 which further comprises treatment of the protective members to accept and retain printing ink.

8. (Original) The method of claim 7 in which the treatment

of the protective members is by corona discharge.

9. (Original) The method of claim 6 wherein the printing is applied to an underside of the protective members.

10. (Original) The method of claim 9 where the protective member is opaque so that the user cannot see the indicia until the protective member is removed.

11. (Original) The method of claim 10 where the underside printing and opaque protective member facilitates using the method for such things as games of chance, premiums, collectibles, redeemables, merchandise acquisition means, and prizes without a user knowing in advance of protective member removal which of a plurality of chances the user has obtained.

12. (Once Amended) The method of claim 1 wherein the protective members are adhered to containers using adhesive.

13. (Original) The method of claim 12 in which the adhesive is antibacterial.

14. (Once Amended) The method of claim 1 which further comprises imposing an anti-static chemical treatment on the protective member such that each one of the protective members will slide easily from an adjoining member and not cling to it under high speed dispensing.

15. (Currently Amended) The method of claim 1 which further comprises imposing chemical treatment on the protective member such that adhesive will bond more strongly to the member and less strongly to metal of the beverage container such that no adhesive residue is left on the container after removal of the protective member thus allowing the protective member to be adhered to other surfaces.

16. (Twice Amended) A business method relating to sealed beverage containers comprising:

conveying by profit making sale a right to attach indicia to consumer removed, ~~highly~~ flexible and ~~collectible~~ protective members to be adhered to a sealed beverage container[[s]];

manufacturing each protective member in an hourglass configuration to facilitate adherence to a top and convex side of a container without deformation and without wrinkling of a material of each protective member;

applying indicia to each protective member; and

adhering each protective member to a container including by folding each over a rim of a beverage can to form a substantially wrinkle free skin tight seal between the protective member and at least a portion of a mouth contact area of the beverage containers.

17. (Twice Amended) A business method relating to sealed beverage containers comprising:

conveying by profit making sale to a third party, a right to attach indicia to consumer removed, [highly] flexible [and collectable] protective members to be adhered to sealed beverage containers;

manufacturing the protective members;

applying indicia to opaque protective members by printing on the underside thereof to facilitate using the method for such things as games of chance, premiums, collectibles, redeemables, merchandise acquisition means, and prizes without a user knowing in advance of protective member removal which of a plurality of chances the user has obtained; and

adhering the protective members to the sealed containers to form a substantially wrinkle free skin tight seal between the protective member and at least a portion of a mouth contact area of the beverage containers.

18. (New) The method of claim 1, wherein the protective members when at least partially removed from the beverage containers are reattachable thereto.

19. (New) The method of claim 1, wherein the protective members are collectible.

20. (New) A sanitary cover for sealed beverage containers comprising:

a flexible protective member of suitable dimension to be adhered to the a mouth contact area and a seal of the beverage

container;

adhesive disposed on the protective member for adhering the protective member in a wrinkle free skin tight manner to the beverage container in the mouth contact area thereof, and substantially adhering to the protective member when the protective member is removed from the beverage container leaving substantially no adhesive residue on the mouth contact area and allowing for reattachment of the protective member to a surface; and

indicia disposed on protective member.
